Profile

A digital creative looking to further my career in interactive design and development. With an eye for precision, and usability, my designs are often well received by my clients as well as their users.

I have experience in managing small teams, and I work well under pressure, to tight deadlines. I like to embrace new technologies, and can quickly learn new software.

Experience

Feb 2017 to Present

The Creative Engine
UI designer & elearning developer

Designing websites, elearning, and retail demos for clients such as Sonos, Nvidia, Microsoft, BT and Weber, I created products which engaged users and promoted their brand.

Starting with exploring the user's needs and requirements, I iteratively developed wireframes, and crafted effective user interfaces which are easy to use.

As a product owner some projects, I had the responsibility to liaise with stakeholders and the client directly, relaying important information back to the team.

Sep 2015 to Feb 2017

The Moment
Elearning designer

My duties involved designing and developing engaging elearning solutions for a range of clients including Carnival, BBC, General Dynamics, and The Royal Navy.

I also produced style guides to aid future development, and designed web apps for training purposes.

Sep 2014 to Jan 2015

Adobe
Student Representative

Whilst at university, I was lucky enough to be chosen by Adobe to be a student representative. My role was to promote and teach fellow students the various benefits of using the Creative Cloud services.

During this time, I also taught a class of 14 students on how to make a responsive website using Adobe Muse..

Education

Sep 2012 to Jun 2015

BA (Hons) Computer Games Arts
University for the Creative Arts

Achieved a First-class Classification.

Student course representative in 2nd and 3rd year.

Sep 2008 to Jul 2010

BTEC National Diploma in Engineering
South Downs College

Achieved Triple Distinction.
